

APPENDIX E - PUBLIC CONSULTATION - STUDY NOTICES

Notice of Class Environmental Assessment Addendum

7th Line Storm Drainage Outlet Town of Innisfil

In 2007, the Town of Innisfil (the Town) completed a Class Environmental Assessment (EA) Study to consider alternatives to improve the drainage capacity of Watercourse No. 5 (Banks Creek) from St. Johns Road to Lake Simcoe. The recommended solution was to replace the existing culvert structure at Cross Street with a new concrete arch span structure to provide a reduction in flooding during more frequent storm events.

An Addendum to the Class EA has been initiated due to the lapse in time since completion of the original Class EA in 2007 and the determination that the recommended solution is no longer applicable. The Addendum will review the current environmental setting to update the project alternatives, including recommended solution, and mitigation measures with consideration of the current planning context and legislation.

Public input and comments are welcome by the Town during the Class EA Addendum process. For further information or to provide input into the Class EA Addendum process, please contact one of the Project Team members identified below. With the exception of personal information, all comments will be part of the public record.

**Re: CLASS ENVIRONMENTAL ASSESSMENT (SCHEDULE B) ADDENDUM FOR THE 7TH LINE
STORM DRAINAGE OUTLET, TOWN OF INNISFIL**

To Whom It May Concern:

Associated Engineering (AE) has been retained by the Town of Innisfil (Town) to assist with the completion of an Addendum to the Municipal Class Environmental Assessment (EA) that was completed in 2007 to consider alternatives to improve the drainage capacity of Watercourse No. 5 from St. Johns Road to Lake Simcoe. Further information on the Study Addendum is provided in the attached Notice of Addendum.

Public and agency consultation is a key element of the Municipal Class EA process and input will be sought from various parties throughout this Addendum. As part of the consultation process, we are inviting agencies and interested parties to provide us with any relevant input related to the Municipal Class EA Addendum and inform us of any concerns or issues which they may have pertaining to the study area.

If you wish to continue to receive information pertaining to the Study or have any questions or comments at any time throughout the Municipal Class EA process, please contact the undersigned by telephone at 905-346-0990 or via e-mail at laplantea@ae.ca

Yours truly,

Andrea LaPlante, P.Eng.
Environmental Assessment Coordinator

Encl: Notice of Addendum
